

# Think of the Week – from 3W

## Is there more future or past?

...

**Emily Yr6**

Every second is the past, so the past gets BIGGER, whilst the future gets smaller. so it's the past.

**Skye, Scott, Lauren and Charlotte**

Past – each second becomes the past

**Louis Yr5 – Aboyne Lodge Primary**

The future is infinite, but time only started when we started counting.

**Josh Yr6**

The world will end in the year 5,000,000,000

**Grace Yr5**

I hope there is more future than past

**Elora Yr5**

It could be past or future because one day the sun will blow up. We don't know how long it will take for the sun to blow up

**Izzy Yr4**

It would probably be the past but it also depends on the future

**Yusuf and Natasha Yr5**

You can't tell how long the future would last. No one really knows which has more.

**No name – please put a name on your suggestions**

The past is smaller because 100 million years ago there was nothing but the future is infinite.
