

Think of the Week – from 5H

What would happen if there was no moon?

...

Nathan 3W

All the currents would be crazy

Ryan 3W

We wouldn't have waves and we would have more day and more night

Nathan 5H

It would make you tired because there would be no night

Will 3W

At night the sun would not shine through the moon, it will have to do nothing

Josh 6ST

We would die by tides and floods and gravitational spins

Jack 6ST

We would die at night because the moon reflects the light and heat at night

No name – please put a name on your suggestions

It would be cold and we wouldn't be able to sleep because we would have to moon to tell us what time it was

No name (probably a teacher)

The Clangers would be homeless
